

ACPS has a new professional development space that is attached to the high school center at Seminole Place. This new student learning space is located in an old industrial space that has been retrofitted and now houses about a dozen high tech businesses.

The Albemarle County Center for Professional Learning at Seminole Place  
1180 Seminole Place Complex  
Suite 225

**Directions:**

Off Route 29 you will turn west on Greenbrier Drive and take the next left into the 1180 Seminole Place Complex. Once in the complex, turn right, turn left and park near the **Main Street Entrance**. There is also a great deal of parking in an upper lot accessed by covered walk ways.

When you come into the main street entrance walk down the long hallway to the sign for Third Avenue. Take a right, go through the flexible, plastic barrier and into the loading dock area. Head down to the loading dock and find the door on the left labeled ACPS. Come up the gray stairs and into the commons area. The Professional Learning rooms are straight ahead on the other side of the kitchen space and commons.

If you need elevator access, come into the main street entrance, walk down the long hallway past the sign for Third Avenue until you see the large Albemarle Tech sign just past the elevator. To use the elevator, push the button continuously until it arrives. Once in the school center, turn left and the Professional Learning rooms are on the other side of the double doors.
